

BABERGH DISTRICT COUNCIL

FROM: Corporate Support Manager

REPORT NUMBER **E59**

TO: Overview and Scrutiny (Community Services)

DATE OF MEETING 12 July 2005

2004/05 BEST VALUE PERFORMANCE INDICATORS AND FUTURE TARGETS

1. **SUMMARY**

- 1.1 The final position is now known for the 2004/05 Best Value Performance Indicators (PIs) and this, along with targets for the next three years are attached at Appendix 1.
- 1.2 This report is an update on E57, presented to the Overview and Scrutiny (Stewardship) Committee on 5 July 2005 and concentrates on those services scrutinised by the Overview and Scrutiny (Community Services) Committee.

2. **RECOMMENDATIONS**

- 2.1 That the committee reviews the PI information contained within Appendix 1 and the tables within this report and determine where further review is necessary.
- 2.2 The Committee is able to resolve this matter

3. **FINANCIAL IMPLICATIONS**

- 3.1 There are no direct financial implications.

4. **KEY INFORMATION**

- 4.1 Appendix 1 shows the final 2004/05 PI figures and compares these with the final figures for 2003/04 and the targets for 2004/05. Also shown are the targets for the next three years as required by the Audit Commission.
- 4.2 The PIs need to be used to drive continuous improvement, so it is important that targets are achieved and that future targets are challenging whilst at the same time, carefully planned so they are achievable and fully resourced.
- 4.3 The future targets need to form part of the council's corporate plan and will be monitored through that document. Members are also reminded that the council's CPA improvement plan contains overall targets for improving the number of PIs it has in the top quartile and above average when compared nationally.
- 4.4 Comparing the 2004/05 final position against the 2004/05 targets:

33 (61%) achieved or exceeded the target and
21 (39%) failed to meet the target.

4.5 Comparing the 2004/05 final position with the 2003/04 final position:

- 40 (67%) showed an improvement
- 5 (8%) matched performance
- 15 (25%) showed poorer performance.

4.6 Comments on both these elements for the PIs scrutinised by this committee are shown below:

PI	2004/05 target missed	2004/05 performance poorer than 2003/04
62 – private unfit dwellings made fit/demolished		Performance down on 2003/04 – but this was planned
64 – private dwellings returned to occupation	10 properties targeted but only 8 achieved. But significant improvement on 2003/04	
66a – proportion of rent collected	Very slight variance	
183b – average length of stay in hostels	Ambitious target set in an area which has always been contentious	Length of stay has increased by 5 weeks
199a – local street and environmental cleanliness (litter) – proportion that falls below acceptable level	Target slightly ambitious. This was a new area being measured. Future targets are more realistic	
84a – number of kgs of household waste collected per head		Slight increase, but targets set look alarming!
86 – cost of waste collection per household	Ambitious target set and almost achieved	
106 – new homes on brown field sites		Performance fell, but target predicated this
109 - % of planning applications determined	A significant dip in performance which should be looked into	A significant dip in performance which should be looked into
166a – score against environmental health checklist	Need to look into why the score fell	Need to look into why the score fell
126a - % of domestic burglaries per 1,000 pop'n		A significant increase
127c - % of violent offences in connection with licensed premises – stranger per 1,000 pop'n		Very slight increase

4.7 A review of the future targets has also been carried out and is shown below:

PI	
183b, 203 & 214 – homelessness PIs	The 2005/05 target for 183b is too aspirational. All targets need to tie in with the homelessness strategy
76 – benefit fraud investigations	Excellent targets which demonstrate a drive for improved efficiency
79b(i) - % of overpayments recovered	Need to find out why the 2005/06 target is lower than the actual achieved in 2004/05

PI	
84 a & b – amount of household waste collection	Alarming that these targets are increasing when we are trying to minimise waste – although they could be a true reflection of the future. Also they seem too high when compared to the 2004/05 84a actual
106 – new homes on brown field sites	Targets aren't challenging
109 - % of planning applications determined	This area needs to be reviewed, with targets set alongside an action plan to drive them
204 – number of planning appeals	Would like to see a decrease in 2006/07 and 2007/08. But these could be based on realism
166a – score against environmental health checklist	Must have an action plan to achieve the targets set

4.8 From the tables above it is concluded that good improvement is being made in the majority of cases and the council's position should improve further when figures are available to make national comparisons. However more thought needs to be given to target setting. Some seem aspirational, or seem to be set in isolation with little regard to past performance, or appear unplanned.

4.9 Members are asked to highlight the PIs contained within Appendix 1 and the above tables that require review and a further report will be presented to this committee at its next meeting.

5. **APPENDICES:**
