Executive Summary

- 1.1 The Councils are now producing a Joint Local Plan (JLP) Review for the Babergh and Mid Suffolk district areas. A key early part of this process is to undertake a call for sites and produce a broad estimate of land supply through a strategic land availability assessment. The Strategic Housing Land Availability Assessment (SHLAA) is a high level assessment which forms a key early part of the plan making process evidence base. **Please note SHLAA sites do not have any formal planning status and are produced as a reference only evidence base document for the Joint Local Plan. It is not a consultation document or a proposal of sites for development.**
- 1.2 There are a large volume of extant planning permissions across the two districts (circa. BDC: 4,300 and MSDC 6,700), which the Councils can have regard to when planning to meet the future housing requirements.
- 1.3 A call for sites took place Jan – Feb 2024. Around 600 sites have been identified for consideration in this SHLAA. All of the SHLAA sites can be viewed on the Councils online GIS system at:
<https://baberghmidsuffolk.opus4.co.uk/planning/localplan/maps/2025-bmsdc-shlaa#/center/52.2182,0.9012/zoom/10/baselayer/b:30/layers/annotations:0,o:13118,o:13119,o:13120>
- 1.4 A windfall rate of 50 dwellings per year and 70 dwellings per year has been identified for Babergh and Mid Suffolk areas respectively.
- 1.5 An assessment process has been carried out on the sites in a two stage process. Sites which do not pass the broad Stage 1 assessment criteria, will not be subject to further detail assessment. A total of 75 sites have been discounted at Stage 1, with over 500 sites then being further assessed.
- 1.6 A broad estimate by parish of total land supply for new capacity is set out in Table A and Table B below:

Table A – Babergh SHLAA sites broad land supply estimate by parish

Introduction

- 2.1 A Strategic Housing Land Availability Assessment (SHLAA) is an essential part of producing a Local Plan. It's purpose is to identify what land is capable of being developed and to assess the constraints and opportunities of developing that land. The SHLAA process highlights issues which help inform future decisions regarding the allocation of land. **However, please note SHLAA sites do not have any formal planning status and are produced as a reference only evidence base document for the Joint Local Plan. It is not a consultation document or a proposal of sites for development.**
- 2.2 The Councils have reviewed and refined the SHLAA methodology to reflect updates to national policy, local priorities and take account of the latest best practice. This document sets out the methodology, including details of the Call for Sites.
- 2.3 The Councils declared in January 2025 that a Joint Local Plan Review (JLP Review) was to be prepared for the districts and a Local Development Scheme was published in March 2025 with an indicative timetable for the production of the JLP Review. Further information on the JLP Review can be found on the Council's websites at:

* <https://www.babergh.gov.uk/joint-local-plan>

* <https://www.midsuffolk.gov.uk/joint-local-plan>

Policy Context

- 2.4 The [National Planning Policy Framework \(NPPF\)](#) paragraph 72 sets out the requirement for local authorities to prepare a Strategic Housing Land Availability Assessment: "Strategic policy-making authorities should have a clear understanding of the land available in their area through the preparation of a strategic housing land availability assessment. From this, planning policies should identify a sufficient supply and mix of sites, taking into account their availability, suitability and likely economic viability".
- 2.5 The [Planning Practice Guidance \(PPG\)](#) for Housing and Economic Land Availability Assessments expands on this by clarifying that:

"An assessment of land availability identifies a future supply of land which is suitable, available and achievable for housing and economic development uses over the plan period. The assessment is an important source of evidence to inform plan-making and decision-taking, and the identification of a 5-year supply of housing land....

... An assessment should:

- identify sites and broad locations with potential for development;*
- assess their development potential; and*
- assess their suitability for development and the likelihood of development coming forward (the availability and achievability)."*

Methodology

3.1 The Councils' SHLAA methodology is to be prepared in accordance with the methodology set out in the PPG. This follows a five phase process, comprising:

- Phase 1 – Identification of sites and broad locations
- Phase 2 – Assessment of sites and broad locations
- Phase 3 – Windfall sites assessment
- Phase 4 – Review of assessment
- Phase 5 – Final evidence base.

Identifying sites and broad locations

Identifying the sites Geographical Area and type of sites

- 3.2 The first stage of the SHLAA is to determine the geographical area of the assessment. The PPG states this should be the plan making area. The geographical area of the assessment is the administrative area of Babergh District Council and Mid Suffolk District Council.
- 3.3 The scope of the sites for this assessment is residential development - primarily open market or affordable housing (C3 use class), supported and special needs housing, self-build and mixed use.

Site Thresholds

- 3.4 The PPG sets out that it may be appropriate to consider all sites capable of delivering 5 or more dwellings. The Councils will apply a minimum threshold of at least 5 dwellings or 0.25ha for sites to be potentially considered in the SHLAA assessment, and subsequently for possible allocation in the Joint Local Plan.
- 3.5 Site proposals below these thresholds are not precluded from coming forward via the planning application process and can be considered for their windfall potential. Small sites being promoted in this way, are recommended to go through the Councils' pre-application processes at [Pre-application advice - Babergh District Council](#) or [Pre-application advice - Mid Suffolk District Council](#).

Desktop Review

- 3.6 The PPG sets out that plan makers need to be proactive in identifying as wide a range of sites and broad locations for housing as possible and do not simply rely on sites that they have been informed about.

- 3.7 Below sets out the data sources that the Councils could use for the desktop identification of sites and broad locations.
- a) Existing housing allocations
 - b) Unimplemented planning permissions
 - c) Sites with a resolution to grant subject to a Section 106 agreement (“S106 sites”)
 - d) Land in the Councils’ ownership
- 3.8 The Councils have a significant number of sites with extant planning permission and the potential to deliver new housing in the JLP Review period. This amounts to an approximate number of identified dwellings as follows:

Table 01 Total district extant planning permissions – April 2024

District	Total extant planning permissions	Total extant planning permissions on commenced sites
Babergh	4,300	2,400
Mid Suffolk	6,700	4,400
TOTAL	11,000	6,800

(all figures are dwellings and have been rounded)

- 3.9 A full schedule of extant planning permissions as at April 2024 is set out in [Appendix 04](#).

Call for Sites

- 3.10 The Councils issued a [residential Call for Sites](#) to enable people to promote sites for consideration and assessment. In accordance with the PPG, this was aimed at as wide an audience as is practical so that those not normally involved in development have the opportunity to contribute.
- 3.11 A [residential Call for Sites](#) was launched on 5th January 2024 until 2nd February 2024. A total of 567 sites were received in the call for sites process. The Call for Sites has been advertised on the Council’s website and notifications sent to those on the Councils Joint Local Plan Database. This has been hosted on the Councils’ Consultation Portal where site promoters, developers, landowners and members of public are required to complete a site submission form process.
- 3.12 For transparency, the Councils have made basic details and maps for all the residential call for sites process available online – [BMSDC residential Call for Sites](#). **Please note SHLAA sites do not have any formal planning status and are produced as a reference only evidence base document for the Joint Local Plan. It is not a consultation document or a proposal of sites for development.**

Additional Sites

The Councils have identified 24 additional sites for consideration in the SHLAA process. These sites have been sourced by considering the draft proposed allocations which were included in the previous Submission version of the Joint Local

Plan. These sites did not go onto to be allocations in the adopted Joint Local Plan Part 1, however, the Councils consider that they may have some potential for development and have therefore been reviewed again for consideration in this SHLAA process. These previously proposed allocation sites have been rolled forward where i) no planning permission has been granted on the site at the time of assessment and ii) they have not already been submitted under the new call for sites process.

Assessment of sites and broad locations

Initial Survey

- 3.13 Managing the call for sites process through the Councils Consultation Portal enables officers to complete the more detailed site assessments in a more digital and efficient manner. However, not all of the information will be accessible to the public, due to the General Data Protection Regulations (GDPR) and commercial sensitivities.
- 3.14 The PPG sets out that an initial survey can be undertaken at this stage to establish up to date, high level information on each site in relation to character and key constraints. At this stage, the PPG also enables the identification of any sites which, when taking into account national policy and designations, it would not be appropriate to carry out the more detailed assessment as it is clear they will not be suitable for development. Sites will be assessed as 'suitable' or 'unsuitable' only for the purpose of identifying and labelling those sites appropriate of further consideration in the SHLAA process and this sifting tool has no formal planning status. Where sites are identified in the Stage 1 SHLAA assessment as 'unsuitable' under any criteria, clear reason(s) will be identified and the site will be excluded from further assessment in the remaining SHLAA process at this time.
- 3.15 A public consultation was carried on the draft SHLAA methodology for housing sites assessment between August and September 2024. A revised methodology (set out below) was then produced and site assessment was carried out over Winter 2024 and Spring 2025 using data sources available at the time.
- 3.16 The methodology for Stage 1 and Stage 2 SHLAA assessment is set out in [Appendix 01](#).
- 3.17 Sites which were rejected at Stage 1 (and the reasons) can be found in [Appendix 02](#).
- 3.18 The detailed site assessments of each site which passed Stage 1 assessment and went onto Stage 2 assessment is set out in [Appendix 03](#). You can also view all of the sites on a map via the Councils GIS system - <https://baberghmidsuffolk.opus4.co.uk/planning/localplan/maps/2025-bmsdc-shlaa#/center/52.2182,0.9012/zoom/10/baselayer/b:30/layers/annotations:0,o:13118,o:13119,o:13120>

Windfall assessment

3.19 The Councils have historically experienced a reliable supply of windfall sites (sites not allocated in the Local Plan or Neighbourhood Plans) coming forward and produce a detailed assessment as part of each Council's respective 5 year housing land supply process. The latest estimates are considered conservative, but identify the following windfall rates for the districts:

- Babergh – 50 dwellings per annum
- Mid Suffolk – 70 dwellings per annum

Review of assessment

Extant planning permissions

4.1 There are a significant amount of extant planning permissions across both districts which will likely come forward to delivery to supporting meeting the identified housing requirements. However, consideration will need to be given to the delivery status (commenced or uncommenced) when identifying the reliance upon them for plan making purposes. A full schedule of extant planning permissions as at April 2024 is set out in [Appendix 04](#).

Table 02 overall district extant planning permission estimates – April 2024.

District	Total outstanding dwellings with PP
Babergh	4,309
Mid Suffolk	6,658
TOTAL	10,967

Site supply timescale estimates

- 4.6 For this assessment, the Councils have taken a provisional broad overview of total SHLAA capacity delivery timescales which will be refined as the plan making process evolves. The following scoring for site assessments has been used to provisionally identify those sites where timescales would be available in the 6-15+ year timescale range.

Q.26 (Existing uses impact) – R or A

Q.27 (Planning delivery history) - A

Q.28 (Evidence of ownership and agreements) - R or A

Q.31 (Relationship to Waste & Minerals Plan designations) - R

- 4.7 All other sites will be provisionally considered to be available within the 0-5 year period. A summary of timescale delivery potential is therefore as follows.

Table 08 delivery estimates of SHLAA sites

District	Timescale 0-5 years	Timescale 6-15+ years	Total
BDC	6,812	10,952	17,764
MSDC	5,995	21,819	27,814
TOTAL	12,807	32,771	45,578

Further information

For any further information, please contact the Planning Policy team on: localplan@baberghmidsuffolk.gov.uk or 0300 1234 000.

If you wish to be notified of any future updates to the Joint Local Plan Review, please register your email address for our [JLP mailing list](#).

AI statement – Artificial Intelligence (AI) has been used in this document to automate the structure of the settlement headings and contents links in some Appendices.

DRAFT

Appendix 01 – SHLAA methodology and data sources

Stage 1 assessment

#	Assessment Criterion	Explanation	Assessment
1.	Is the site for fewer than 5 dwellings or less than 0.25ha.?	Site thresholds not met.	Unsuitable – site is below 0.25ha or does not have capacity to accommodate at least five dwellings. Suitable – site is above 0.25ha or has capacity to accommodate more than five dwellings.
2.	Does the site have extant planning permission? Has development commenced? Was development still under way at the date of the most recent Housing Land Supply Assessment?	If the site has extant planning permission and development has commenced, and the site continues to be 'Under Construction' ('U/C') as recorded in the most recent Housing Land Supply Assessment, there is an expectation that the site will be built out and no further development potential. If a site has extant planning permission but that has not been implemented, the site will not be ruled out at this stage. If a site has an implemented extant planning permission but was not actively under construction in the most recent Housing Land Supply Assessment (which is usually annual) and is not fully built out, the site will not be ruled out because it may have potential for alternative development.	Unsuitable – site has extant planning permission, has commenced development, and continues to be under construction. Suitable – site does not have an extant planning permission or site has extant planning permission but development has not commenced or site has an extant implemented planning permission but is not actively under construction (and not completed).
3.	Is the site already allocated for residential development in the Babergh or Mid Suffolk Development Plan or a Neighbourhood Plan, with extant planning	If the site is allocated and there is evidence to suggest it is going to be delivered in the near future i.e., pre application discussions with Local	Unsuitable – site is allocated in the Development Plan and has extant planning permission or site is allocated in the

#	Assessment Criterion	Explanation	Assessment
	permission or is it allocated with a strong likelihood of planning application being submitted within 20 years?	Planning Authority, Planning Performance Agreement (PPA) in place, Masterplan being progressed or adopted or information provided by the developer/landowner there is no requirement to assess the site for its deliverability as the principle of development has already been established. The Joint Local Plan period is expected to be 20 years.	Development Plan and there is a strong likelihood a planning application will be submitted within 20 years. Suitable – site is not allocated in the Development Plan and does not have an extant planning permission or site is allocated in the Development and does not have a strong likelihood of a planning application being submitted within 20 years. Or site is allocated in the Development Plan for residential and has potential for net additional development.
4.	What is the site ownership situation?	Assessing a site's availability is a key component of its overall deliverability. Information regarding any issues with ownership of the land are important to this assessment.	Unsuitable – ownership not known or uncertain. Suitable – ownership identified.
5.	Is 75% or more of the site located within flood zone 3?	Sites will be excluded for development if 75% or greater of the site is in Flood Zone 3. The NPPF is clear that development should be directed away from areas at the highest risk of flooding.	Unsuitable – site is 75% or more in Flood Zone 3. Suitable – site is less than 75% within Flood Zone 3.
6.	Is the site wholly located within any of the following designations? Site of Special Scientific Interest (SSSI) Special Area of Conservation (SAC) Special Protection Area (SPA) Scheduled Ancient Monument (SAM) Ancient Woodlands RAMSAR	Sites wholly located within a designation will be excluded. The NPPF contains many commitments to protecting sites nationally or internationally designated for their biological, geological, archaeological importance.	Unsuitable – site is wholly located within the designation. Suitable – site is partially or not at all located within the designation.

Stage 2 assessment

Section A: Constraints

#	Assessment Criterion	Explanation	Assessment
Physical constraints			
7.	Location of site to built* or commenced development.	New development well related to existing development can assist to provide better context and identity of settlements. This can usually lead to better sustainability outcomes through easier accessibility to sustainable transport methods, facilities and reducing the need to travel. Infrastructure provision can be more effective and limit impacts upon countryside areas. * For this assessment, built form will exclude existing and historic farmsteads.	Red – no sides of the site adjoin to built form or commenced planning permission Amber – 1 or 2 sides of the site adjoin to built form or commenced planning permission Green – 3 or more sides of the site adjoin to built form or commenced planning permission.
8.	Would development of the site lead to coalescence between settlements?	Protecting the individual identity of settlements is considered an important principle of planning and remains an important issue locally for settlements that are in close proximity to each other.	Red – significant contribution to coalescence. Amber – some contribution which results in a reduction of green space between settlements. Green – no contribution to coalescence.
9.	Is there any evidence that it would not be possible to deliver the necessary utilities (wastewater /sewerage supply, gas supply, electricity supply, broadband and digital communications) when needed?	Utility provision is a key component of development viability. The Call for Sites proforma requests specific information on utility provision in order to gain a general understanding of provision in the locality.	Red – significant issues with utility provision which are likely to affect the site's deliverability. Amber – some issues with utility provision. Green – no known issues with utility provision.

#	Assessment Criterion	Explanation	Assessment
10.	Are there any issues that could prevent/limit the developable area of the site? e.g. Public Rights of Way (PRoW), pylons, major pipelines, ground instability and/or contamination.	The presence of site-specific issues can significantly affect deliverability through the impact of achievability and availability. Identifying site-specific issues early ensure sites are not allocated which are not capable of being delivered within reasonable timescales.	Red – significant site-specific issues which are likely to affect the site's deliverability. Amber – less than significant site-specific issues identified. Green – no known site-specific issues.
11.	Is the site brownfield or greenfield?	The inclusion of this criterion reflects the NPPF's preference for utilising previously developed land (brownfield land) over greenfield land.	Red – n/a. Amber – greenfield site. Green – wholly or partially brownfield site.
12.	What is the agricultural land classification?	The NPPF states that Local Planning Authorities should take into account the economic and other benefits of the best and most versatile agricultural land. The most obvious way of doing this is to identify the quality of agricultural land on potential development sites through the assessment. # For this assessment, Grade 3 land will be assumed to include land in Grade 3a. However, not all Grade 3 land will be the best and most versatile agricultural land. The consideration of detailed land value quality (eg. distinctions between Grade 3a and 3b) will be at a later stage in the site selection process.	Red – n/a. Amber – wholly or partly Grades 1, 2 and/or 3#. Green – Grade 4 or Urban.
13.	Impact of neighbouring uses (e.g. noise, smell, amenity) – would development be likely to be negatively impacted by, or cause negative	The NPPF requires plan makers to achieve high quality design and good standards of amenity for occupants. Ensuring sensitive uses such as housing, are not located	Red – there is a strong possibility development would be significantly affected by neighbouring use issues.

#	Assessment Criterion	Explanation	Assessment
	impact on, neighbouring areas?	in close proximity to other uses which may compromise the health and wellbeing of occupants is fundamental to achieving these objectives.	Amber – there is a possibility development would result in some neighbouring use issues. Green – there are no neighbouring use issues.
14.	Impact upon a formal recreational provision? (e.g. sports pitch, play area, allotments, parks,).	Recreation areas are of public value and provide important opportunities to improve health and well-being. Sites will normally only be suitable if the recreational provision is surplus to requirements, or can be replaced by a better or equivalent provision of size and quality.	Red – would result in loss of provision and no identified surplus provision in locality. Amber – would result in loss of provision, but surplus provision in locality. Green – site would not impact on provision.
Natural and Historic Environmental Constraints			
15.	Is the site partially located within/adjoining any of the following designations? • Site of Special Scientific Interest (SSSI) • Special Area of Conservation (SAC) • Special Protection Area (SPA) • Ancient Woodlands • RAMSAR	The NPPF contains many commitments to protecting sites nationally or internationally designated for their landscape, biological, geological importance.	Red – site is partially or wholly located within a designation. Amber – site is adjoining a designation. Green – site is not located within or adjoining any designations listed.
16.	Is the site partially located within/adjoining the designations of National Landscape (formerly Area of Outstanding Natural Beauty (AONB)	The NPPF provides the highest degree of landscape protection of national landscapes. It identifies that major development should only be located there in exceptional circumstances and if it is in the public interest.	Red – site is partially or wholly located within a designation. Amber – site is adjoining a designation or within a national landscape 'project area'. Green – site is not located within/adjoining a designation or within a national landscape 'project area'.
17.	Is the site part of any designations within a made Neighbourhood Plan?	Planning law requires that applications for planning permission be determined in accordance with the development plan, (which includes neighbourhood plans that have been	Red – site is partially or wholly located within a designation. Amber – site is adjoining a designation.

#	Assessment Criterion	Explanation	Assessment
		brought into force), unless material considerations indicate otherwise. It is appropriate that the similar weight is provided to neighbourhood plans in considering future allocations.	Green – site is not within any designations.
18.	Is the site located within the Protected Habitats Zone of Influence and/or SSSI impact risk zones?	A number of internationally protected habitat sites are located within or close proximity to the Plan area. These sites are protected under the provisions of Wildlife and Countryside Act 1981 and Natural Environment and Rural Communities Act 2006. National policy identifies that development should initially consider whether avoidance of these sensitive areas is practical. In circumstances where this is not possible, appropriate mitigation should be provided. Habitats Regulation Assessments should be carried out to identify the scope of impacts and appropriately consider actions required.	Red – n/a. Amber – site is partially or wholly located within a designation Green – site is not within this designation.
19.	Is the site located within any of the following local designations? • Local Wildlife Site (LoWS) • Local Nature Reserve (LNR)	The NPPF encourages the protection and enhancement of sites of biodiversity and geological value.	Red – site is wholly or partially within a designation. Amber – site is wholly or partially adjoining a designation. Green – site is not located wholly or partially within any designations listed.
20.	Would development of the site be likely to cause harm to any archaeological or heritage assets or their setting? Grade 1, Grade 2 Grade 2* Listed Building, Scheduled Monument, (SAM) Registered Parks and Gardens, Conservation Areas, adopted Neighbourhood	The NPPF states that Local Planning Authorities should recognise that heritage assets are an irreplaceable resource and conserve them in a manner appropriate to their significance.	Red – there is a strong possibility of harm to a known/ designated heritage asset. Amber – there is a possibility of harm to designated or non-designated heritage assets.

#	Assessment Criterion	Explanation	Assessment
	Plan identified Locally Listed Heritage Asset, archaeological assets.		Green – no potential harm.
21.	What extent of the site is covered by flooding from surface water and/or flood zones 2/3?	The NPPF is clear that inappropriate development in areas at risk of flooding should be avoided by directing development away from areas at highest risk, subject to any site specific flood risk assessment.	Red – approximately 50% or more covered Amber – approximately 1% - 49% covered Green – 0% covered
<u>Access to Key Services</u>			
22.	Distance to primary schools	NPPF states that all plans should promote a sustainable pattern of development. Limiting the need to travel and offering a genuine choice of transport modes can help to reduce congestion and emissions and improve air quality and public health. Distances for assessment are 'as the crow flies' and have been identified with regard to the Sustainability Appraisal Scoping Report – Aug 2024 (App A) and the Institute of Highways and Transportation.	Red – site is in excess of 801m of a primary school. Amber – site is within 401 and 800m of a primary school. Green – site is within 400m of a primary school.
23.	Distance to secondary school	NPPF states that all plans should promote a sustainable pattern of development. Limiting the need to travel and offering a genuine choice of transport modes can help to reduce congestion and emissions and improve air quality and public health. Distances for assessment are 'as the crow flies' and have been identified with regard to the Sustainability Appraisal Scoping Report – Aug 2024 (App A) and the Institute of Highways and Transportation.	Red – site is in excess of 5km of a secondary school. Amber – site is within 800m – 5km of a secondary school. Green – site is less than 800m of a secondary school.

#	Assessment Criterion	Explanation	Assessment
24.	Distance to GP health facility	NPPF states that all plans should promote a sustainable pattern of development. Limiting the need to travel and offering a genuine choice of transport modes can help to reduce congestion and emissions and improve air quality and public health. Distances for assessment are ‘as the crow flies’ and have been identified with regard to the Sustainability Appraisal Scoping Report – Aug 2024 (App A) and the Institute of Highways and Transportation.	Red – site is in excess of 5km of a GP. Amber – site is within 800m – 5km of a GP. Green – site is less than 800m of a GP.
25.	Relationship to strategic transport corridor (as defined in the adopted JLP Part 1)	NPPF states that all plans should promote a sustainable pattern of development. Limiting the need to travel and offering a genuine choice of sustainable transport modes can help to reduce congestion and emissions and improve air quality and public health.	Red – n/a. Amber – outside of strategic transport corridor. Green – wholly or partially within strategic transport corridor.

Section B: Availability

A site is considered to be available for development when, on the best information available, there is confidence that there are no legal or ownership impediments to development. For example, land controlled by a developer or landowner who has expressed an intention to develop may be considered available. The availability of a site could be adversely affected if it is in multiple ownership and the intentions of all interested parties are not known.

Availability			
#	Assessment Criterion	Explanation	Assessment
26.	Is the site currently in use and is it likely to continue to be used for the foreseeable future / would that use prevent	Information regarding a site’s current use is important in determining availability and the timescale of it being	Red – site is occupied/in use and there are likely to be significant delays to relocating its current use and/or potential policy conflict.

#	Assessment Criterion	Explanation	Assessment
	development on the site from coming forward?	available to be developed.	Amber – site is occupied/in use but its current use does not require relocation. Green – site is vacant or its current use can cease within 5 years.
27.	Does the site have a history of unimplemented permissions?		Red – three or more expired permissions. Amber – up to two expired permissions in the last 10 years. Green – no unimplemented permissions.
28.	Is the site ownership and/or cooperation evidenced clearly with official documentation?	Evidence of ownership and cooperation would include Land Registry Title Deeds and Title Plans, land options and development agreements with relevant land parties.	Red – no evidence provided. Amber – incomplete evidence provided. Green – full evidence provided.

Section C: Achievability (inc. viability)

A site is considered achievable if there is a reasonable prospect that the particular type of development will be developed on the site at a particular time and whether it is financially viable to do so. For example, a site could be both suitable and available, but the level of financial mitigation required to make it acceptable could result in the site being considered unviable.

Achievability

#	Assessment Criterion	Explanation	Assessment
29.	Is development of the site in line with existing policies requiring a contribution, i.e., affordable housing, is development of the site economically viable? Are there any factors which could limit its viability?	Economic viability is a key component of a site's deliverability as defined in the NPPF. Establishing the viability of development sites ensures that decisions on future allocations take into account any abnormal costs which may affect development outcomes.	Red – development is likely unviable. Amber – development is marginal or unknown. Green – development is likely viable.

#	Assessment Criterion	Explanation	Assessment
30.	Can the site be accessed by vehicle from the public highway? Does the development of, or access to, the site rely on another piece of land, and has that land been put forward for development?	Highways access both for resident vehicles and service vehicles (as well as emergency vehicles) to a road designated as class A, B, C or U. Relying on another piece of land to come forward (e.g. ransom strips) can prevent development from coming forward or render development unviable. Establishing the presence of ransom strips through the assessment process provides the Council with reasonable assumptions about a site's achievability.	Red – site does not have direct or indirect highways access. Site is not adjacent to a classified road. Amber – site has indirect access to a classified road through another site which is also promoted for development. Green – site has direct highways access. Site is adjacent to a classified road.
31.	Is the site within a Minerals Safeguarding Area and/or Minerals and Waste Consultation Area?	Land may be protected for a number of different uses irrespective of the land ownership. For example, the land may be safeguarded because of its value as a minerals extraction site. Where a promoted site lies within a Minerals Safeguarding Area, SCC will be consulted to confirm whether a Minerals Resource Assessment is required (this applies where the area of a site within a Minerals Safeguarding Area is 5ha or over – this includes contiguous parcels i.e. cant split Site into 4a, 4b, 4c, 4d etc. to negate the threshold) Where a promoted site lies within a Minerals and/or Waste Consultation Area, a Minerals and/or Waste Infrastructure Impact Assessment is required.	Red – site is wholly within a Minerals Safeguarding Area. Mineral could be sterilised as a result of the non-mineral proposal. Amber – site is within a Minerals Consultation Area and/or a Waste Consultation Area. Green – not within a Minerals Safeguarding Area, Minerals Consultation Area or Waste Consultation Area.
32.	Is the land currently protected for an	Land may be protected for a number of different	Red – all or part of site is protected for an alternative

#	Assessment Criterion	Explanation	Assessment
	alternative use within the adopted Joint Local Plan Part 1?	uses irrespective of the land ownership.	use and there is no evidence to suggest that the site should be released for an alternative use. Amber – all or part of site is protected for an alternative use but there is evidence to suggest that the site could or should be released for an alternative use. Green – site is not protected for any alternative use.

Data Sources:

Criteria Number	Assessment Criterion	Data Source

Site assessment stage 1:

Criteria	Score	Comments
1. Site size	Suitable	Proposed 25 dwellings + 1.8ha
2. Extant planning status	Suitable	No extant planning permission
3. Existing allocation status	Suitable	Not allocated within Development Plan
4. Ownership identified	Suitable	Ownership identified
5. Flood zone 3 status	Suitable	0% within Flood Zone 3
6. Contained within environmental designations	Suitable	Not within designations

Site assessment stage 2:

Criteria	Score	Comments
7. Adjacent to existing built/commenced development	G	Adjoins built form 1 side
8. Lead to coalescence	G	Would not lead to coalescence
9. Utilities delivery issues	G	No known issues
10. Developable area constraints	G	No known issues
11. Brownfield, greenfield, or mixed use land	A	Greenfield
12. Agricultural land use class	A	Grade 2
13. Impact on neighbouring uses	R	Within WRC buffer zone and adjacent power station
14. Formal recreational provision	G	No impact
15. Relationship to environmental designations	G	No designations
16. Relationship to national landscapes (formerly AONBs)	A	Within national landscape project area
17. Relationship with made Neighbourhood Plan designations	A	Viewpoint is located on edge of site, has potential to cause

Criteria	Score	Comments
		obstruction, but is not located within the site
18. Relationship with HRA/SSSI designations	A	Within Mods PHMZ and SSSI IRZ
19. Relationship with local environmental designations	G	No designations
20. Heritage assets impact possibility	G	No impact
21. Flood risk status	G	No flood risk
22. Proximity to primary school	G	Within 400m
23. Proximity to secondary school	A	Within 5km
24. Proximity to GP surgery	A	Within 5km
25. Relationship to strategic transport corridor	G	Within transport corridor
26. Existing uses impact	G	Site vacant
27. Planning delivery history	G	No unimplemented permissions
28. Evidence of ownership and agreements	R	No evidence provided
29. Evidence of viability	G	Likely viable
30. Site access to public highway	G	Adjacent to classified road
31. Relationship to Minerals and Waste Plan designations	A	Within minerals consultation area
32. Existing Joint Local Plan – Part 1 designations	G	Not protected

26. Existing uses impact	G	Site is vacant or its current use can cease within 5 yrs
27. Planning delivery history	G	No implemented permissions
28. Evidence of ownership and agreements	R	No evidence provided
29. Evidence of viability	G	Development is likely viable
30. Site access to public highway	G	Site has direct access to Park Road (C)
31. Relationship to Minerals and Waste Plan designations	G	Site is not located within a Mineral Consultation Area
32. Existing Joint Local Plan – Part 1 designations	G	Site is not protected for any alternative use

Site details:

SITE ID:	HE23024
District:	Mid Suffolk
Parish:	Combs
Site Address:	Land West of Poplar Hill.
Approx site area (ha)	12
Land type:	GRN.

Site proposals:

Proposal:	Housing (C3), Supported and special needs housing.
Proposed dwellings:	300

Site assessment stage 1:

Criteria	Score	Comments
1. Site size	Suitable	12ha and 300 dwellings proposed
2. Extant planning status	Suitable	no extant PP
3. Existing allocation status	Suitable	no allocation - adjacent to Farriers Road allocation (SAAP)
4. Ownership identified	Suitable	owner identified
5. Flood zone 3 status	Suitable	0% in FZ3
6. Contained within environmental designations	Suitable	0% in any designation

Site assessment stage 2:

Criteria	Score	Comments
7. Adjacent to existing built/commenced development	A	2 sides of the site adjoin to built form or commenced planning permission
8. Lead to coalescence	G	No contribution to coalescence
9. Utilities delivery issues	G	No known issues
10. Developable area constraints	G	PRoW runs along the edge of the site but would not impact development
11. Brownfield, greenfield, or mixed use land	A	Greenfield site
12. Agricultural land use class	A	Grade 2 Grade 3
13. Impact on neighbouring uses	G	No known issues
14. Formal recreational provision	G	Site would not impact on provision
15. Relationship to environmental designations	G	Site is not located within any of the designations listed
16. Relationship to national landscapes (formerly AONBs)	G	Site is not located within any of the designations listed

Criteria	Score	Comments
17. Relationship with made Neighbourhood Plan designations	G	Site is not located within any of the designations listed
18. Relationship with HRA/SSSI designations	A	Site is wholly located within IRZ
19. Relationship with local environmental designations	G	Site is not located within any of the designations listed
20. Heritage assets impact possibility	G	Site is not located within any of the designations listed
21. Flood risk status	A	SW - 8%
22. Proximity to primary school	R	Site is in excess of 800m of a primary school
23. Proximity to secondary school	A	Site is located within 5km of a secondary school
24. Proximity to GP surgery	A	Site is located within 5km of a GP
25. Relationship to strategic transport corridor	A	Site is not located within the transport corridor
26. Existing uses impact	G	Site is vacant or its current use can cease within 5 yrs
27. Planning delivery history	G	No implemented permissions
28. Evidence of ownership and agreements	R	No evidence provided
29. Evidence of viability	G	Development is likely viable
30. Site access to public highway	A	No direct access to any road - relies on HE23020 to be developed. (Site was considered Not Suitable)
31. Relationship to Minerals and Waste Plan designations	A	Site is located within a Mineral Consultation Area
32. Existing Joint Local Plan – Part 1 designations	G	Site is not protected for any alternative use

20. Heritage assets impact possibility	A	Site is located near to a County Geodiversity site and there is a possibility of harm to designated or non-designated heritage assets. Site is adjoining a conservation area and is located within 100m of a conservation area
21. Flood risk status	A	SW - 2.2%
22. Proximity to primary school	A	Site is located within 800m of a primary school
23. Proximity to secondary school	R	Site is in excess of 5km of a secondary school
24. Proximity to GP surgery	A	Site is located within 5km of a GP
25. Relationship to strategic transport corridor	A	Site is not located with the transport corridor
26. Existing uses impact	G	Site is vacant or its current use can cease within 5 yrs
27. Planning delivery history	G	No implemented permissions
28. Evidence of ownership and agreements	R	No evidence provided
29. Evidence of viability	G	Development is likely viable
30. Site access to public highway	G	Site has direct access to U Road - High Street and C Road - Stowmarket Road
31. Relationship to Minerals and Waste Plan designations	A	Site is located within a Mineral Consultation Area
32. Existing Joint Local Plan – Part 1 designations	G	Site is not protected for any alternative use

Site details:

SITE ID:	HE23068
District:	Mid Suffolk
Parish:	Rattlesden
Site Address:	Land west of School Road, Rattlesden.
Approx site area (ha)	1.8
Land type:	GRN.

Site proposals:

Proposal:	Housing (C3), Mixed use.
Proposed dwellings:	25

Site assessment stage 1:

Criteria	Score	Comments
1. Site size	Suitable	1.8 and 25 dwellings proposed
2. Extant planning status	Suitable	No extant PP
3. Existing allocation status	Suitable	No allocation
4. Ownership identified	Suitable	Owner identified
5. Flood zone 3 status	Suitable	0% in FZ3
6. Contained within environmental designations	Suitable	0% in any designation

Site assessment stage 2:

Criteria	Score	Comments
7. Adjacent to existing built/commenced development	A	2 sides of the site adjoin to built form or commenced planning permission
8. Lead to coalescence	G	No contribution to coalescence
9. Utilities delivery issues	G	No known issues
10. Developable area constraints	G	No known issues
11. Brownfield, greenfield, or mixed use land	A	Greenfield site
12. Agricultural land use class	A	Grade 3
13. Impact on neighbouring uses	A	Site is located near a water recycling centre - there is a possibility development would result in some neighbouring use issues.
14. Formal recreational provision	G	Site would not impact on provision
15. Relationship to environmental designations	G	Site is not located within any of the designations listed
16. Relationship to national landscapes (formerly AONBs)	G	Site is not located within any of the designations listed
